## ***Welcome to JACE Systems™***

JACE Systems is a recognized leader in the design and manufacture of continuous passive motion equipment (CPM) for patients recovering from orthopedic surgery. Our devices enable patients to begin their post operative rehabilitation immediately after surgery.

JACE Systems is a fully licensed FDA GMP manufacturing facility operated under ISO 9001 and ISO 13485 guidelines. Our products are also recognized with Underwriters Laboratory (U/L) seal of approval.

Founded in 1989, we are located in Cherry Hill, New Jersey.

### **About Us:**

Our products support the rehabilitation of patients recovering from orthopedic surgery throughout the world. Our business is divided into three broad categories:

1. Continuous Passive Motion (CPM) systems to assist orthopedic surgery patients in the post-operative recovery period.
2. Electrotherapy devices to reduce pain, increase circulation, increase range of motion, and prevent or retard tissue atrophy (muscle wasting)
3. A comprehensive customer service and insurance benefits organization assisting patients, clinicians and payers in gaining access to our equipment and provide the highest quality care at the least cost possible.

Our Continuous Passive Motion (CPM) systems are designed to reduce pain, reduce edema and improve range of motion following orthopedic surgery. Our CPM systems have demonstrated the ability to reduce hospital stay and reduce the overall cost of care by allowing ongoing treatment and support in the home. We specialize in both Upper (UE) and Lower (LE) Extremity CPM systems.

The JACE Systems customer service center recognizes the individual needs of patients, clinicians, employers, case managers and provider networks in a changing healthcare environment. JACE Systems partners with all members of the healthcare team to provide quality care while reducing cost as much as possible.

*We are happy to provide you with our equipment and services during your time of medical need and if we can assist you further, please feel free to contact us.*
